

CENTRL Adds Continuous, Real-time Cyber Risk Monitoring Powered By BlueVoyant

CENTRL partners with BlueVoyant, a leading Cyber Defense firm, to provide continuous monitoring and mitigation of vulnerabilities in third parties across the global Securities Services and Investment Management ecosystem – fully integrated with CENTRL's industry leading Diligence platform.

▶ INTEGRATED CYBER RISK MANAGEMENT

▶ PROBLEM WE SOLVE

Cyber-crime is a problem that has been fairly ubiquitous for a long time now. In 2018, SWIFT issued a stark warning that securities market participants were especially vulnerable to cyber-attacks, a scenario which risked causing all sorts of systemic challenges.

In a worst case scenario, a successful cyber-attack on an intermediary provider(s) could result in assets being frozen or stolen in the custody chain, or the manipulation of market and/or reference data (i.e. standing settlement instructions, pricing, etc.) for financial gain.

▶ KEY BENEFITS

- Real-time, continuous monitoring and mitigation of cyber risk for third parties
- Mitigation and remediation carried out via direct engagement with third parties on company's behalf
- Rapid identification of newly discovered vulnerabilities and guided mitigation efforts at each impacted vendor within hours – not days
- Map findings against multiple regulatory and specific control frameworks
- Leverage tailored proprietary and commercially available data to identify cyber risk

▶ KEY FEATURES

• Real-Time Cyber Monitoring

- Real-time, continuous monitoring of cyber risk for all third parties
- Incorporate proprietary threat intelligence that can expose active targeting and identify imminent threats
- Provide real-time visibility into third party risk postures with alerts, confirmed incidents and remediation status

• Advanced Cyber Risk Identification Capabilities

- Superior data collection and machine learning-enabled analytics provide a complete view of the distributed attack surface
- Analysts from BlueVoyant's Risk Operation Center curate findings to remove false positives and provide only relevant, targeted actionable insights

• Mitigation of Emerging Vulnerabilities

- Pro-active reviews of newly identified cyber risks and critical vulnerabilities across third party ecosystem
- Analysts contact vendors directly to remediate in advance of any escalation resulting from a potential incident

• Alignment With Control Frameworks and Risk Appetite

- Quickly identify compliance issues based on multiple regulatory or company specific control frameworks
- Set risk appetite in line with desired thresholds to manage and drive risk reduction to agreed thresholds

• Remediation With Vendor Collaboration

- Deliver visibility, evidence, prioritization and specific remediation action plans for events and vulnerabilities
- Analysts work directly with third parties on company's behalf to resolve issues, safeguarding relationships with third-parties

• Rapid Deployment & Highly Scalable

- CENTRL system offers out-of-the box scores for significant number of third parties in Securities Services and Investment Management ecosystem
- Add new third parties and enable tracking rapidly
- Monitor thousands of third parties with existing resources

• Fully Integrated With CENTRL's Diligence Platform

- Third party cyber risk scores fully integrated into CENTRL's application
- Cyber risk scores integrated into existing third- party risk dashboards
- Seamlessly share findings with company SMEs

FULL LIFE CYCLE OF CYBER RISK MANAGEMENT

ACCESS

Evaluate cyber risk associated with third party targets

REVEAL

Prioritize based by identifying key risk factors.

MANAGE

Integrated expertise to surface relevant risks and triage what matters.

ENGAGE

Playbooks built on global best practices to interact with your network.

RESPOND

Remediate risks quickly and effectively.
